Hi Jack, thanks for taking a look. The windows version is for functionality testing only, the buttons and layout work well on a phone but not so good on the windows version.

Currently I don't want to add any more to the app but want to get this version perfect. Please let me know of any error in menus, gameplay etc.

Save files from e-mail, right click on .zip file, extract to any location, run Mugs Away.Exe from chosen location.
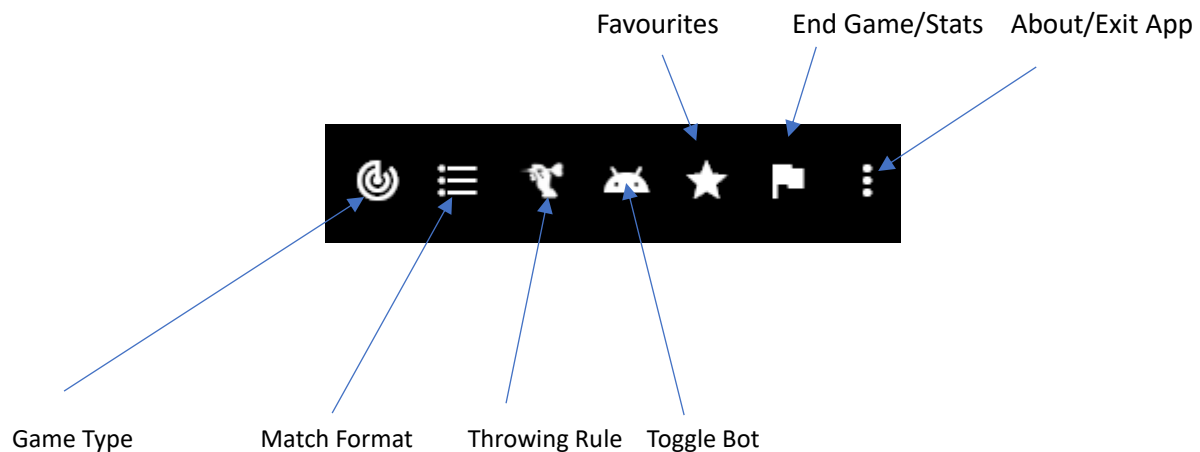

Thank you very much.

**Mugs Away** a simple dart app for simple dart players.

Default game is always 501 continuous.

Players can play 501 until they choose to end the game. Leg scores are shown on the players scorecard.

Menu.

Favourites   End Game/Stats   About/Exit App

Game Type   Match Format   Throwing Rule   Toggle Bot

## Game Type Menu. Allows players to select 01 game options.

**Match Format Menu.** Allows players to select Match Format options or create a custom game.

Throwing Rule Menu. Allows players to select Alternative player throw or Mugs Away (loser of last leg throws first).

Enable/disable Bot. Clicking this icon allows single players to have an opponent. Once clicked select Bot skill level from the dropdown menu.

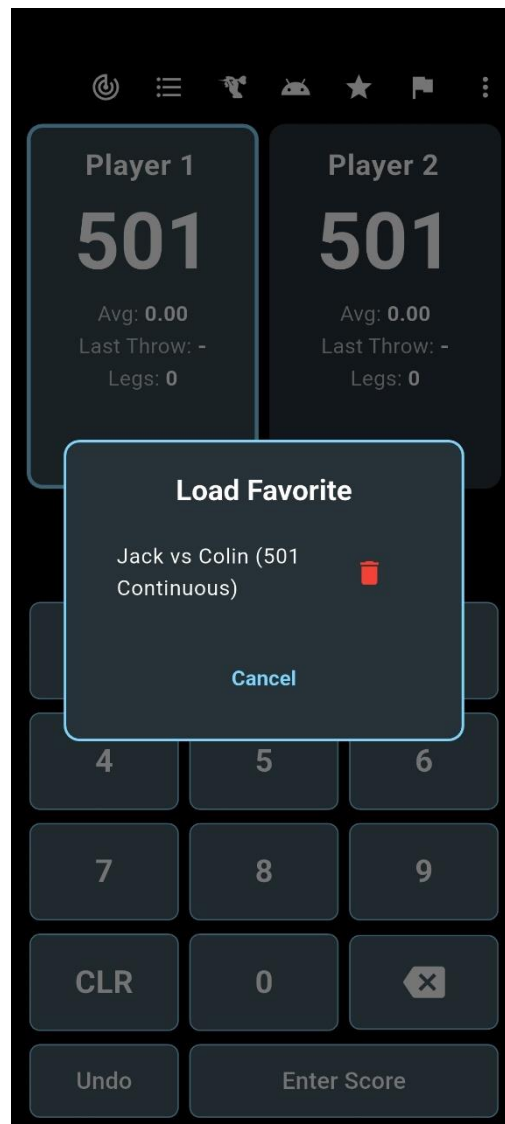

Once selected skill level will be shown on the Bots scorecard clicking this will re-open the skill select dropdown menu.

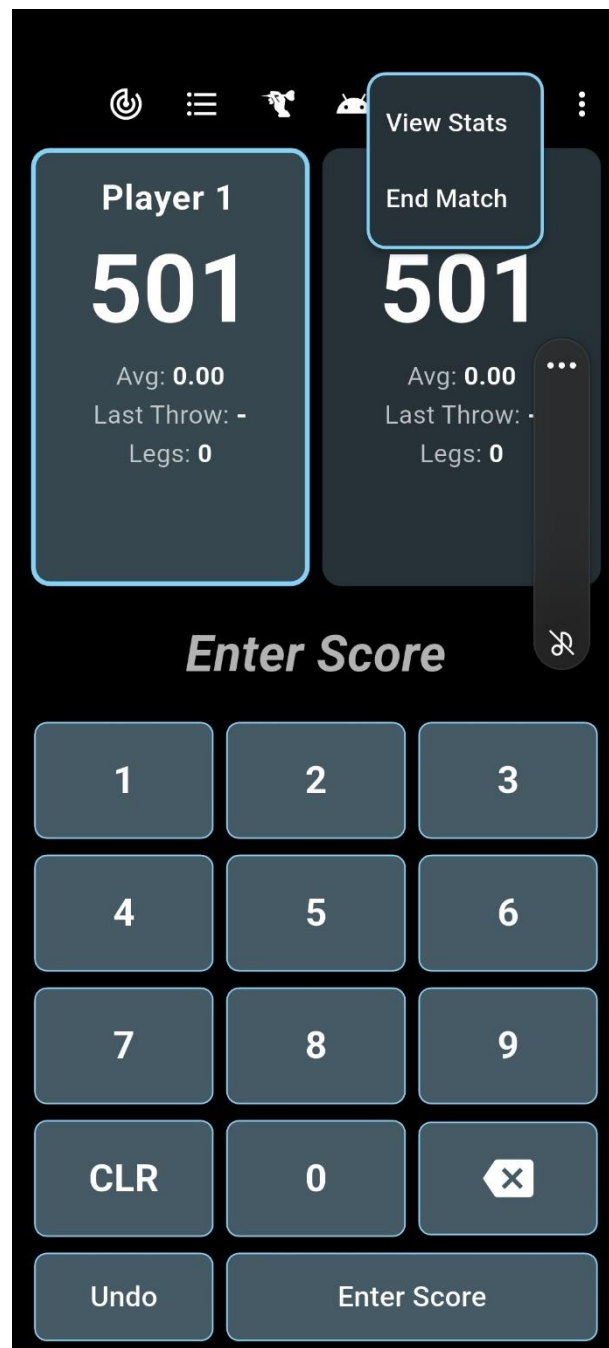

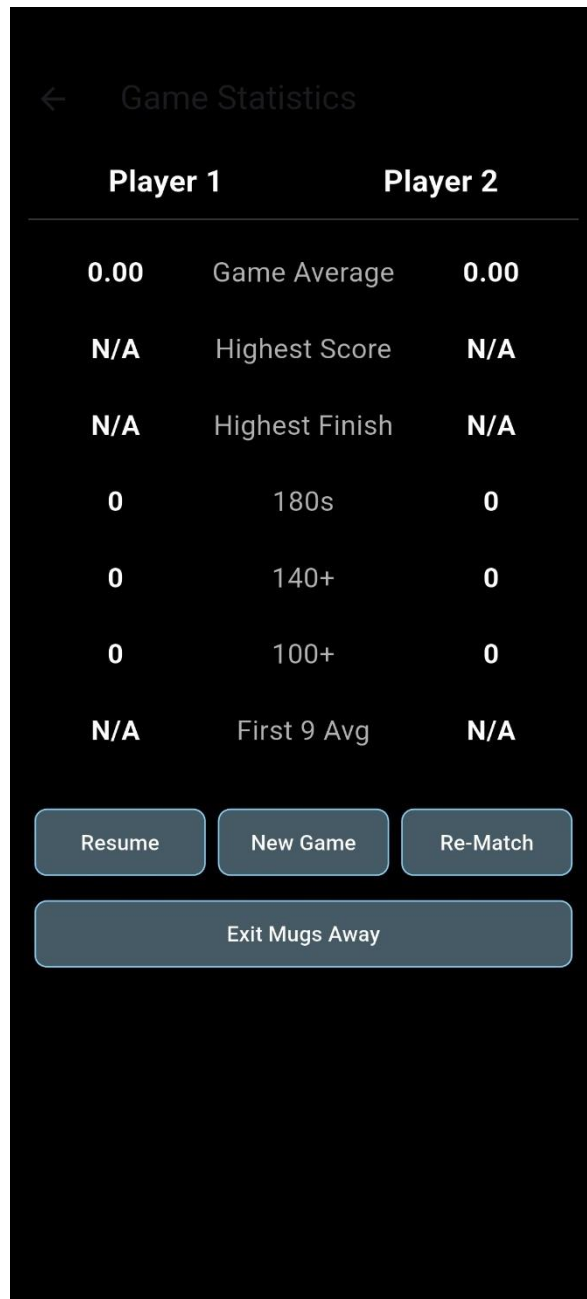

Selected Bot Skill Level

Favourites Menu. Allows players to save, load and delete favourite game setups

Match Actions menu. Selecting the flag icon will allow the players to view match statistics while the game is ongoing. Selecting End Match will show the final statistics of the Match.

Statistics Page. The statistics page shows the current game stats or the final stats of the game depending on menu selection. From this page the players can resume the current game, start a new game, or if the game has ended, start a rematch with same settings. Players can also close the app.
